

# WEST COAST FERTILITY CENTERS FOUNTAIN VALLEY, CALIFORNIA

Medical Director signature: \_\_\_\_\_

A comparison of clinic success rates may not be meaningful because patient medical characteristics and treatment approaches vary from clinic to clinic. For more details about this, along with information on how to interpret the statistics in this table, see pages ##-##.

## CURRENT CLINIC SERVICES AND PROFILE

Current Name: West Coast Fertility Centers			
Donor egg?	Yes	Gestational carriers?	Yes
Donor embryo?	No	Cryopreservation?	Yes
Single women?	Yes	(See Appendix C for details.)	

- (a) Reflects patient and treatment characteristics of ART cycles performed in 2006 using fresh nondonor eggs or embryos. 12/05/2007
- (b) When fewer than 20 cycles are reported in an age category, rates are shown as a fraction and confidence intervals are not given. Calculating percentages from fractions may be misleading and is not encouraged.
- (c) A multiple-infant birth is counted as one live birth.
- (d) Clinic-specific outcome rates are unreliable for women older than 42 undergoing ART cycles using fresh or frozen embryos with nondonor eggs. Readers are urged to review national outcomes for these age groups (see page ##).
- (e) All ages (including ages >42) are reported together because previous data show that patient age does not materially affect success with donor eggs.
