

WEST COAST FERTILITY CENTERS FOUNTAIN VALLEY, CALIFORNIA

Medical Director signature: _____ Print Name: _____

A comparison of clinic success rates may not be meaningful because patient medical characteristics and treatment approaches vary from clinic to clinic. For more details about this, along with information on how to interpret the statistics in this table, see pages ##-##.

2008 ART CYCLE PROFILE							
Type of ART (a)				Patient Diagnosis			
IVF	100%	Procedural Factors:		Tubal factor	16%	Other factor	2%
GIFT	0%	With ICSI	80%	Ovulatory dysfunction	8%	Unknown factor	4%
ZIFT	0%	Unstimulated	0%	Diminished ovarian reserve	10%	Multiple Factors:	
Combination	0%	Used gestational carrier	0%	Endometriosis	3%	Female factors only	22%
		Used PGD	19%	Uterine factor	1%	Female & male factors	21%
				Male factor	13%		

2008 PREGNANCY SUCCESS RATES		Data verified by David G Diaz, MD				
Type of Cycle		Age of Woman				
Fresh Embryos from Nondonor Eggs		<35	35-37	38-40	41-42	43-44 (d)
Number of cycles		81	42	50	9	4
Percentage of cycles resulting in pregnancies (b)		49.4	52.4	28.0	0 / 9	0 / 4
Percentage of cycles resulting in live births (b,c)		40.7	47.6	26.0	0 / 9	0 / 4
(Confidence Interval)		(29.9–52.2)	(32.0–63.6)	(14.6–40.3)		
Percentage of retrievals resulting in live births (b,c)		42.3	48.8	27.1	0 / 7	0 / 3
Percentage of transfers resulting in live births (b,c)		50.0	55.6	33.3	0 / 3	
Percentage of transfers resulting in singleton live births (b)		24.2	38.9	25.6	0 / 3	
Percentage of cancellations (b)		3.7	2.4	4.0	2 / 9	1 / 4
Average number embryos transferred		2.3	2.4	2.7	4.0	
Percentage of pregnancies with twins (b)		47.5	27.3	3 / 14		
Percentage of pregnancies with triplets or more (b)		2.5	0.0	1 / 14		
Percentage of live births having multiple infants (b,c)		51.5	30.0	3 / 13		

Frozen Embryos from Nondonor Eggs		<35	35-37	38-40	41-42	43-44 (d)
Number of transfers		47	21	10	2	0
Percentage of transfers resulting in live births (b,c)		48.9	42.9	1 / 10	0 / 2	
Average number of embryos transferred		3.1	2.8	3.4	1.5	

Donor Eggs	All Ages Combined (e)	
	Fresh Embryos	Frozen Embryos
Number of transfers	11	7
Percentage of transfers resulting in live births (b,c)	7 / 11	1 / 7
Average number of embryos transferred	2.5	2.9

CURRENT CLINIC SERVICES AND PROFILE			
Current Name: West Coast Fertility Centers			
Donor egg?	Yes	Gestational carriers? Yes	SART member? Yes
Donor embryo?	No	Cryopreservation? Yes	Verified lab accreditation? Yes
Single women?	Yes	(See Appendix C for details.)	

- (a) Reflects patient and treatment characteristics of ART cycles performed in 2008 using fresh nondonor eggs or embryos. 01/05/2010-058
- (b) When fewer than 20 cycles are reported in an age category, rates are shown as a fraction and confidence intervals are not given. Calculating percentages from fractions may be misleading and is not encouraged.
- (c) A multiple-infant birth is counted as one live birth.
- (d) Clinic-specific outcome rates for women older than 44 undergoing ART cycles using fresh or frozen embryos with nondonor eggs are not included because of small numbers. Readers are urged to review national outcomes for these age groups (see page ##).
- (e) All ages (including ages >44) are reported together because previous data show that patient age does not materially affect success with donor eggs.
